

CDM Solutions

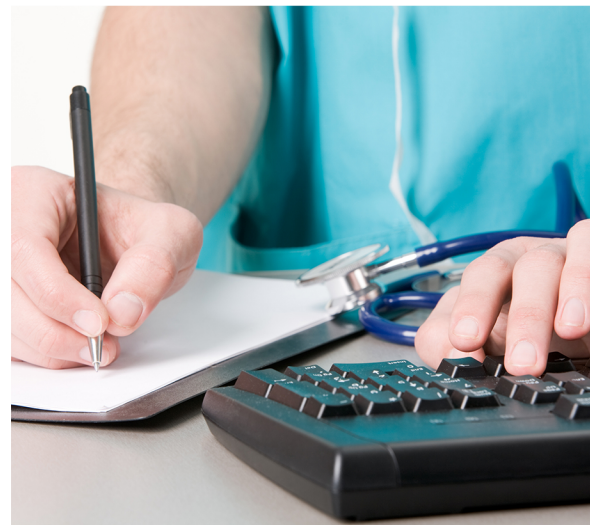

Today more than ever, hospitals operate in a complicated financial and regulatory environment that demands complete and accurate billing to ensure appropriate reimbursement for the services provided.

Coupled with changes in the healthcare delivery systems to a largely prospective payment model in the outpatient environment, alongside complicated interfaces with Clinical Information Systems, the Charge Description Master (CDM) requires constant surveillance. Without that monitoring, the smallest oversight can expose a hospital to significant revenue loss. Let our dynamic, and highly customizable, CDM and charge process solutions help you mitigate those risks.

Our nationally recognized seasoned experts devote their time to ensuring the integrity of your CDM, to include the complex interplay of electronic interfaces to surpass payer scrutiny and denials, while ensuring you are receiving all applicable reimbursement for the services provided. What differentiates our solution from the rest? Aside from the talented group of reimbursement, coding and clinical experts, we provide the following:

- On-site meetings with each department
- Electronic review in addition to desk audit of each line on your CDM
- Evaluation of order-entry sub-systems and their impact on the CDM
- Comparison of HCPCS/CPT codes to payer guidelines
- Evaluation of revenue codes for increased accuracy and applicability to cost reporting requirements
- Identification of duplicate, unused and invalid HCPCS/CPT codes
- Review of hard-coded modifiers
- Pricing assessments relative to payment rates and similar CDM items
- Identification of appropriate bundling or unbundling of services
- Analysis of claims and associated medical records to ensure appropriate charge capture of all services rendered.

Our consultants do the heavy lifting to reduce the burden on your staff, emphasizing teamwork throughout the process. It's our way of ensuring we fulfill all the deliverables we both believe are important.

Part of an even larger solution

As a full-service compliance, reimbursement and revenue cycle we are constantly developing new ways to assist our clients in becoming more compliant and generate more revenue. Our team of experts look beyond the task at hand so we can bring opportunities to your attention.
